If yes, which one	(s)?			
Focus Area of the	e RFP (check all tha	t apply)		
☐ Improving (elementary and mi	ddle school (K-8) educ	ators' mathematical co	ntent knowledge in one or
more doma	ains, with a focus o	n the major work of th	e grade.	
□ Increasing	understanding of t	he standards, progress	sions, coherence, and p	pedagogical opportunities for
the Integra	ted Mathematics P	athway in high school.		
Deepening	the understanding	and the use of model	ing as a means to pror	note reasoning and critical
thinking in mathematics, science, career and technical education, and/or STEM classrooms				
Increase ur	derstanding of ho	w collaboration betwe	en mathematics, scien	ce, and career technical
courses car	n deepen subject a	rea content knowledge	e in science and mathe	matics as well as expand
students' re	eadiness for college	e and/or careers.		
Expand und	derstanding of scie	nce through scientific	reading and writing wi	thin the content area.
Subject:	Math	Science	Other (please	specify)
Grade Levels:	K-5	6-8	9-12	Higher Ed

REQUIREMENTS

Requirements:	Met/Not Met
Project includes at least one LEA that meets the high need definition	
(defined below)	
Partnership includes at least one IHE department of math, science, or	
engineering	
Proposal includes evidence of consultation with private schools	
during planning process	

Proposals must meet all 3 requirements above to advance to Section II of review.

High Need School District(s): At least one LEA must meet one or more of the following criteria:

- The district TVAAS composite is 1, 2, or 3 in overall numeracy in targeted grade; OR
- The district is below the state average for the percent of students Proficient or Advanced in: 3-8 math, algebra I, algebra II, 3-8 science, or biology.

Evaluation Rubric

	Project Abstract (5 points possible)					
Indicator	Exceeds Minimum Requirements 5 points	Meets Requirements 3 points	Does Not Meet Requirements 1 point	Points Awarded		
Project Abstract	A strong abstract will identify project lead and key program initiative(s) as well as outline how activities will lead to goal attainment.	Abstract identifies project lead and key program initiative(s).	Little or no clarity about the project need or purpose or lack of clarity on project leadership.			
	TOTAL F	POINTS				

JUSTIFICATION / COMMENTS (REQUIRED):

Identifies primary and supporting partnersAt least one IHE engineering, mathematics, or science department and at least one high-need school district are identified as primary partners who will implement the project and be accountable for its outcomes. Supporting partners are clearly identified and roles defined as applicable.At least one IHE engineering, mathematics, or science department and at least one high-need school district are identified as primary partners but additional partners' roles are not clearly defined.Documents active planning and involvement of all primaryPlanning is described but not clearly documented. Most of the	Does Not Meet Requirements 1 point	Points Awarded

	Implementation	n Plan (40 points possible)		
Indicator	Exceeds Minimum Requirements 5 points	Meets Requirements 3 points	Does Not Meet Requirements 1 point	Points Awarded
Provides a detailed description of the target audience including how participants will be selected and retained	Describes in detail who the participants are including subject areas, grade levels, numbers of participants to be served and how they will attend (as individuals, grade level teams, school teams, etc.). Also describes participant selection process, emphasizing how those with the greatest need will be incentivized to participate and strategies to be implemented to encourage retention in the project.	Identifies participant group, but lacks either a detailed description of who they are or how they were selected or will be retained.	Participants are identified, but lacks both a description of how/why they were selected and how they will be encouraged to stick with the project.	
States the focus area for the project Defines professional development design clearly in terms of summer institutes, graduate courses, on-line courses, workshops, coaching, etc.	The PD focus area is clearly stated and PD design is defined. A detailed description of each major component is provided including total number of instructional hours as well as duration, focus areas, structure, and the roles of each partner in development and implementation of each.	The PD focus area is clearly stated and PD design is defined. A description of design components is provided for all major components and activities and their implementation. Description lacks some of the detail needed for the reader to replicate the PD implementation plan.	PD focus area and design may or may not be clearly stated. Activities are not likely to be effective. Project activities may or may not be aligned to the TN Academic Standards.	
Describes the design and implementation of major components and activities	Included is a description of how each component will 1) engage teachers with content at a level	Most activities are likely to be effective but one or two have been included that are of	Project activities are included that are of questionable value or of no substantial value OR project

	Project Managem	ent Plan (15 points possible)		
Indicator	Exceeds Minimum Requirements 5 points	Meets Requirements 3 points	Does Not Meet Requirements 1 point	Points Awarded
Provides a description of how the project will be administered that supports the scope and administrative requirements of the project	Clearly describes how the day-to-day management of the project will be executed. Identifies personnel involved in decision-making, budgeting, and making implementation adjustments to activities and expenditures. Roles, responsibilities, and time commitments of personnel involved in project management are described. If a Management Team is to be formed, team members are identified, schedule of meetings is provided and decision-making process is described. Management plan strongly supports the scope and administrative requirements of the project.	Provides some detail of the day-to-day management of the project; AND/OR Roles, responsibilities and time commitments are vague and the decision-making process is unclear; AND/OR More detail is needed to determine whether the management plan supports the scope and administrative requirements of the project.	The management plan is poorly described and/or appears to be inadequate to support the scope and administrative requirements of the project.	

Identifies each of the primary partners and describes in detail the role they will serve in helping the project achieve its objectives	All primary partners are fully engaged in the project management and oversight. Activities in the implementation plan are tied to partners' missions. Strong evidence presented to justify the number of quality partners who will carry out the proposed activities. Qualifications are provided for partners who demonstrate highly aligned expertise for the particular role each will serve.	Not all primary partners are fully engaged in project management and oversight. All primary partners are identified and appear to have satisfactory experience/expertise to successfully carry out the roles they are assigned.	Fewprimary partners are identified and the number appears to be inadequate for the scope of the project AND/OR those identified lack qualifications, experience, or expertise to successfully carry out their roles.	
Identifies the fiscal agent and person responsible for overseeing the project's fiscal	The fiscal agent and the person responsible for overseeing the project's fiscal activities are clearly	The fiscal agent is identified but the person overseeing the project's fiscal activities is not.	Neither the fiscal agent nor the person responsible for the project's fiscal activities are identified.

summative data on project	methods. For each objective, an	OR		

objectives	evaluation table clearly lists suitable data to be collected, the instruments or protocols used, and target audience for the data collection. Mechanisms are described for gathering ongoing formative feedback on project activities and participant progress and incorporating it into project planning.	The evaluation gives insufficient attention to gathering and using formative data.		
Describes a credible evaluation design and appropriate instruments and protocols to be used	Evaluation design includes collecting data from both the participant group and a similar comparison group (random assignment preferred but not required). Pre/post measures are collected for both groups, with statistical analysis comparing pre/post changes. Size of the participant and comparison groups is sufficient for the analysis to detect meaningful differences. Instruments to be used for teacher or student content assessment have a significant objective component (not just self-report) and have documented validity and reliability.	Evaluation design may include a comparison group. At a minimum, pre/post measures are collected from the participant group to document changes during the project. Number of teachers is sufficient for statistical analysis. Instruments to be used for teacher or student content assessment have a significant objective component (not just self-report), but validity and reliability are not discussed or are not available.	Evaluation design includes only post- testing participants. Baseline data are not collected to enable changes to be measured. OR Teacher or student content assessment is by self-report measures only; no objective assessment is included.	
Presents a detailed timeline of the evaluation activities	Timeline is clear and specific about evaluation- related activities and when they will occur. Timing and scope of activities are reasonable when compared to the typical school year. Measures/instruments are clearly identified as well as the number of and classification of the participants.	Timeline is presented but does not include ALL of the required information OR is only very general.	Timeline is not available OR is so generic that no assessment of its quality or reasonableness can be made.	
Presents a research design to investigate the effects of the professional development	The research component is designed to yield credible information about the PD approach taken by the project	The proposal contains a research component, but it lacks clarity as to the nature of the information to be	A research component is not included OR is not distinct from the project's summative evaluation.	

model chosen	that can be used by others working in this domain. (Examples of such information could include: generalizing results beyond the participant group; identifying factors in the PD model and their contribution to the outcomes observed; examining system barriers and supports that impact implementing the PD model; etc.) The design is appropriate to the nature and scale of the project and is likely to produce useable knowledge.	generated OR has design issues that make it unlikely to yield the intended information OR is unclear about who will be involved in carrying out the research.

	clearly show how all aspects of the plan will be supported. No funds are budgeted for unrelated expenditures.	plan but it may not be clear how all aspects of the plan will be supported.		
Budget is appropriate for the scope of the activities described	The budget supports all of the project objectives and activities. Overall cost of the project clearly match services proposed, professional development outlined and/or number of teachers served. Budget is consistent with roles of the partners. Budget is adequate and does not include excessive spending on peripheral project needs.	Most elements in the implementation plan appear adequately budgeted for. Expenditures are reasonable and focus on needs. Budget expenditures may appear higher than expected for some of the proposed activities. Budget is consistent with roles of the partners.	The budget does not directly support project objectives and activities. Funds are budgeted for unrelated purposes AND/OR do not focus on needs. Budget is inconsistent with the roles of partners.
